SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 173 December 1986

CONTENTS

The IUTAM Symposium on Fluid Mechanics in the spirit of G. I. Taylor *page* vii

Geoffrey Ingram Taylor, 7 March 1886–27 June 1975. G. K. Batchelor 1

The numerical experiment in fluid mechanics. Hassan Aref 15

Acoustic monitoring of ocean gyres. Walter Munk 43

The development of the winged keel for twelve-metre yachts. P. van Oossanen and P. N. Joubert 55

Viscous fingering in Hele-Shaw cells. P. G. Saffman 73

Bubble formation, motion and interaction in a Hele-Shaw cell. T. Maxworthy 95

Stability in systems with moving contact lines. E. B. Dussan V. and S. H. Davis 115

An experimental study of transient effects in the breakup of viscous drops. H. A. Stone, B. J. Bentley and L. G. Leal 131

Viscous starting jets. Brian J. Cantwell 159

Individual and collective fluid dynamics of swimming cells. John O. Kessler 191

A series-expansion study of the Navier–Stokes equations with applications to three-dimensional separation patterns. A. E. Perry and M. S. Chong 207

Experimental and numerical study of vortex couples in two-dimensional flows. Y. Couder and C. Basdevant 225

Convective flows with multiple spatial periodicities. Mary Lowe, B. Steven Albert and J. P. Gollub 253

Secondary bifurcations of Taylor vortices into wavy inflow or outflow boundaries. G. Iooss 273

On the existence of localized rotational disturbances which propagate without change of structure in an inviscid fluid. H. K. Moffatt 289

Coherent structures and turbulence. A. K. M. Fazle Hussain 303

The fractal facets of turbulence. K. R. Sreenivasan and C. Meneveau 357

Quantum turbulence. Russell J. Donnelly and Charles E. Swanson 387

Turbulent entrainment: the development of the entrainment assumption, and its application to geophysical flows. J. S. Turner 431

An experiment on boundary mixing: mean circulation and transport rates. O. M. Phillips, Jinn-Hwa Shyu and Haydee Salmun 473

Experiments with baroclinic vortex pairs in a rotating fluid. R. W. GRIFFITHS and E. J. HOPFINGER 501

Space-laboratory and numerical simulations of thermal convection in a rotating hemispherical shell with radial gravity. JOHN E. HART, GARY A. GLATZMAIER and JURI TOOMRE 519

Asymptotic theory of convection in a rotating, cylindrical annulus. F. H. BUSSE 545

The intrusion of fluid mechanics into geology. HERBERT E. HUPPERT 557

Bending waves on inviscid columnar vortices. S. LEIBOVICH, S. N. BROWN and Y. PATEL 595

The Taylor internal structure of weak shock waves. D. G. CRIGHTON 625

Acoustic emissions by vortex motions. T. KAMBE 643

Fundamentals concerning wave loading on offshore structures. JAMES LIGHTHILL 667

Eulerian and Lagrangian aspects of surface waves. M. S. LONGUET-HIGGINS 683

INDEX TO VOLUME 173 709
